- A. 3412
- B. 3142
- C. 3421
- D. 3124

- Sticky, gooey, oftentimes orange, and homemade within the ears - earwax is considered a gross nuisance that people tend to frequently remove and clean from the body. Whether it's by cotton swab, an ill-advised and method, or by an otolaryngologist, people go to great lengths for unobstructed ear canals—but is removing earwax a good idea? Why does our body produce earwax in the first place if we just remove it in the end?
- Earwax, also known by the formal name cerumen, is made from a mixture of long-chain fatty acids, alcohols, cholesterol, and the chemical compound squalene. It's secreted by glands in the outer ear canal in order to block dust, bacteria, insects, and other outside agents from infiltrating the ear canal and damaging the skin in the outer ear and the sensitive inner ear. While it's incredibly beneficial to the health of the ear, overproduction can cause earwax impaction, blocking sound waves from reaching the eardrum. Use of cotton swabs to clean excessive earwax can lead to further problems, pushing the wax farther into the inner ear canal rather than drawing it out. This has the potential to cause permanent damage to the eardrum and hearing abilities.
- Q11) Which of the following best fits the blank in the passage?
- A.Complex
- B.Toxic
- C.Dangerous
- D.Safe

- Sticky, gooey, oftentimes orange, and homemade within the ears - earwax is considered a gross nuisance that people tend to frequently remove and clean from the body. Whether it's by cotton swab, an ill-advised and method, or by an otolaryngologist, people go to great lengths for unobstructed ear canals—but is removing earwax a good idea? Why does our body produce earwax in the first place if we just remove it in the end?
- Earwax, also known by the formal name cerumen, is made from a mixture of long-chain fatty acids, alcohols, cholesterol, and the chemical compound squalene. It's secreted by glands in the outer ear canal in order to block dust, bacteria, insects, and other outside agents from infiltrating the ear canal and damaging the skin in the outer ear and the sensitive inner ear. While it's incredibly beneficial to the health of the ear, overproduction can cause earwax impaction, blocking sound waves from reaching the eardrum. Use of cotton swabs to clean excessive earwax can lead to further problems, pushing the wax farther into the inner ear canal rather than drawing it out. This has the potential to cause permanent damage to the eardrum and hearing abilities.
- Q12) State whether the following statement is true or false.
- The author prefers that earwax be cleaned with cotton swabs instead of it remaining there and blocking sound.
- A.True
- B.False
- C.Cannot be determined

- Q13) Find out which underlined part of the sentence below has an error and mark the option accordingly.
- I am guilty of not knowing you have come to me to seek help for the next issue of your magazine.
